Re-Order #	Description	Size	Unit
914902	Lion	15" Diameter	Each
914901	Bear	15" Diameter	Each
914900	Monkey	15" Diameter	Each

Purpose

It has been determined that there is a calming and therapeutic effect when soft and cushioned surfaces are touched. The three animals depicted on these pillows add another level of interest for the child to make a connection too. The pillows are a full 15" in diameter and 4" inches thick and can be used on the lap or bed.

Easy to Use

These sensory pillows should be placed on the persons lap or convenient surface. The individual should be encouraged to feel the various surfaces and identify the feel. Once the correct sensations are identified it is recommended that similar surfaces of other products be compared with the pillow.

Easy Care

The sensory animal pillows can be cleaned with a mild detergent or can be laundered (washed only). If they are placed in a dryer the fluffy polyester covering will shrink and loose their pile, but air drying is acceptable.
