

ABC Breast Form - Massage Form Collection

Have you experienced the undeniable benefits of the Massage Form®? ABC has created a collection of Massage Forms® that gives you options. Now you can experience the unique benefits of the patented Massage Form®—the exclusive breast forms only by American Breast Care.

When it comes to fitting a patient, one style does not fit all. As fitters, we know that no two patients are the same, but we can agree that having a comfortable fit experience is shared among many of them. Since 2009, women throughout the world have experienced the everyday comfort of a Massage Form®, the patented collection of breast forms that massage, cool and hug the chest wall. It is important that your patients are offered a product that is not only comfortable to wear, but one that provides a suitable fit. The Massage Form® Collection is a proven and established line of breast forms that offer a mix of varying Lightweight silicones and bra cup profiles for a combination that will undoubtedly give your patient the comfort and confidence she deserves. After wearing the Massage Form®, your patients will thank you for improving their fit and wear experience. Be among the many fitters who have chosen the Massage Form® time and again.

Massage Form® Silhouette	Massage Form® Super Soft	Massage Form® Air	Massage Form® Asymmetric
			
<p>Features a shallow profile and natural drape in the bra cup.</p>	<p>Available as a non-adhesive (Style 10275) and adhesive (Style 10475) breast form with an average profile and natural drape in the bra cup. Style 10275 is available in blush and tawny.</p>	<p>Lighter than Lightweight, this Air breast form provides an average to full profile in the bra cup.</p>	<p>Features a standard asymmetric footprint with a full profile in the bra cup</p>

5 Reasons to try the Massage Form®

1. Comfortable for women living with lymphedema
2. Massages the chest wall
3. More security because of the asymmetric design, it snugs against the wall.
4. Made with Lightweight silicone and made with ABC's new Satin Skin.
5. Provides coolness and comfort.

Coolness Study: The Massage Form®

Prof. Dr. Bernhard Kurz at the University of Applied Sciences in Munich, Germany conducted an independent study on the patented design of the Massage Form®. Findings proved that wearing the Massage Form® resulted in lower amounts of perspiration and better air exchange when compared to a standard back, lightweight breast form.

Softness Study: The Massage Form®

Similar breast forms from three different manufacturers were tested in this study to detect the level of softness in each breast form. A measurement system with pressure sensors was developed that pressed each breast form and the natural breast to a depth of 40mm. This test simulates the range of pressure felt by a breast when hugged. The results confirmed that the softness of the ABC Super Soft silicone breast forms, as depicted by the graph above, best reflect the softness of the natural female breast.

Softness Study was conducted by Prof. Dr. Bernhard Kurz at the University of Applied Sciences in Munich. The ABC breast forms below are made with Super Soft Silicone:
